

WORLD COIN

DATA CONSENT FORM v2.3

Consent to Process Sensitive Data and for Data Transfer to Another Country

By agreeing to this Data Consent Form, you allow us to collect images of your iris and other Sensitive Data through the Orb and transfer the Sensitive Data to our teams in the United States, Germany, the United Kingdom, India, and Japan for the purposes such as training of our neural network for the recognition of human irises, as further described below. You also agree that the neural network is not error-free, meaning it may determine that you have claimed Worldcoin previously in error.

IMPORTANT: PROVIDING YOUR CONSENT AND PARTICIPATING IN THE WORLD COIN PROJECT DESCRIBED BELOW IS COMPLETELY VOLUNTARY, AND YOU ARE UNDER NO OBLIGATION TO GIVE US YOUR CONSENT. HOWEVER, IF YOU DO NOT GIVE US YOUR CONSENT, YOUR ABILITY TO PARTICIPATE IN THE WORLD COIN PROJECT AT THIS TIME MAY BE LIMITED. YOU MAY CHANGE YOUR MIND AND WITHDRAW YOUR CONSENT AT ANY TIME.

Tools for Humanity Corporation, a Delaware corporation located in San Francisco, CA, USA and its wholly-owned subsidiary Tools For Humanity GmbH, located in Erlangen, Bavaria, Germany (collectively, “**Worldcoin**”, “**we**”, “**our**”, or “**us**”) would like your consent to: (a) collect and process certain personal information from you (your “**Data**”), and (b) to transfer your Data from the country where you live to another country, solely for the purposes described in this consent form (“**Consent Form**”).

Your consent and our use of your Data is also subject to the terms of our Privacy Statement, available at getworldcoin.com/Privacy. The Privacy Statement generally describes the Data we collect, how we process your Data, what we use the Data for, how we store your Data, with whom we share your Data, and your rights under applicable privacy laws (“**Privacy Laws**”). This Consent Form concerns specific types of Data that by their nature are considered more sensitive than other Data (“**Sensitive Data**”; described in more details in Section 4 below). To comply with certain Privacy Laws, we are required to obtain your formal written consent before we collect and process any Sensitive Data from you, or transfer your Sensitive Data from one country to another country.

1. THE WORLD COIN PROJECT

We are developing a software algorithm (the “**Algorithm**”) that can distinguish minute differences among human irises using a special device called an Orb. The Orb is capable of taking extremely detailed images of a participant’s face and eyes, including the iris, sclera, eyelashes and other parts of the eye. We would like to train the Algorithm to get better at recognizing the differences between participants’ irises, and therefore we need to collect and process as many images of irises as we can. We need to differentiate among participants’ irises because we are trying to develop a global software protocol and cryptocurrency using blockchain technology, called Worldcoin, that will permit every person on the planet to receive a fair share of Worldcoin tokens. The Algorithm is an automated decision-making process and we plan to use the Algorithm and the Orbs to prevent anyone from claiming more than their fair share of Worldcoin. The Algorithm is necessary to ensure that people aren’t claiming more than their fair share. We use images of the iris because the iris is even more provably unique than the human face or fingerprints.

If you give us your consent to collect your Sensitive Data by photographing your iris, your face, and your head (shoulders up) using the Orb, we will transfer your Sensitive Data to our teams in the United States, Germany, the United Kingdom, India, and Japan because: (a) our research and development team members are located in those countries, and (b) we are unable to operate the software we use to process your Sensitive Data where you live. As a result, we may transfer and store your Sensitive Data in part in the United States or other countries where Privacy Laws may be less protective of your Data than the Privacy Laws in the European Union (the General Data Protection Regulation or “**GDPR**”) or the Privacy Laws of the country where you live. Furthermore, like all software, the Algorithm is not error-free and may make an incorrect decision, such as determining that you have already claimed your Worldcoins when you haven’t. By agreeing to this Data Consent Form, you also agree that your only recourse is to stop the sign-up process if you disagree with the Algorithm’s decision.

2. RISKS OF TRANSFER

Below is a list of possible risks that may arise if we transfer your Sensitive Data to the countries we've mentioned above. (Please note that this list contains examples, but may not include all possible risks to you):

- If you are a resident of the European Union and you share your Data with us, we are required to comply with the GDPR, but it may be more difficult to assert your privacy rights in court in the United States if we do not comply.
- Further, if we share your Data with any subprocessors outside your country with or without your permission, that subprocessor may not be subject to the GDPR or the Data Privacy Laws of your country, and if the subprocessor decides to use or share your Data for purposes not described in this Consent Form or in our Privacy Statement against your will, it might be difficult or even impossible to assert your privacy rights against that subprocessor.
- It is possible that your rights under the GDPR or the Privacy Laws in your country are in conflict with the Privacy Laws in the United States, and courts in the United States may interpret your rights differently from courts in the European Union or in your country.

Naturally, we will do everything possible to ensure that these risks do not materialize. We voluntarily comply with the GDPR as a matter of policy. We fully support your right to understand your rights and risks under this Consent Form and the GDPR and you should feel free to ask us any questions you may have before you sign. If you sign this Consent Form, we will be contractually required to use your Sensitive Data exclusively for the Worldcoin Project in the manner described above, but the terms of this contract may not be sufficient to fully protect your rights.

3. NO FINDING OF ADEQUACY OF UNITED STATES PRIVACY LAWS

The European Union Commission responsible for making determinations of the adequacy of the Privacy Laws of other jurisdictions in comparison to the GDPR has not yet positively established that the country-specific level of personal data protection in the United States, where part of your Data is processed, provides the same level of protection as the Privacy Laws in the European Union.

In addition, we have not adopted a board-approved data privacy and security policy describing the means and the methods by which we plan to protect your Data to meet the standards prevalent in the GDPR, nor have we submitted our Privacy Statement or any of our internal policies and procedures to any regulatory authority to determine whether they meet GDPR standards of protection. Therefore, there is a possibility that our policies and procedures will not be sufficient to meet GDPR requirements.

4. CONSENT

In order to carry out the objectives of the Worldcoin Project, we are asking for your consent to process (collect, store and use) your Sensitive Data and to transfer it to our teams in the United States, Germany, the United Kingdom, India, and Japan.

We will collect the following Sensitive Data:

- High-definition images of your head (shoulders and up) and eyes, including your irises (visible, near-infrared and far-infrared spectrum); and
- Three-dimensional mapping of your head and shoulder.

Please note that the image of your iris may fall under "Special Categories of Personal Data" under the GDPR and may be considered "Sensitive Data" in certain other jurisdictions, and is therefore afforded special protections under the Law.

First, the Algorithm analyzes the raw images of your iris to create a digital file containing a purely numeric representation of the unique characteristics of your iris. Second, the Algorithm uses cryptographic hashing techniques to encrypt the file into a secure code (the "iris code"). Once generated by the Algorithm, your iris code cannot be reversed to expose the precise characteristics of your iris to any computer system or to anyone else. Third, the Algorithm compares your iris code to the iris codes in the Worldcoin database to determine whether we have already scanned your iris. If your iris code matches another iris code in the Worldcoin database, then we can determine that you have already scanned your iris using the Orb. Absent you re-presenting yourself to our Orb, however, we are not able to use the Worldcoin database to determine whether you have already scanned your iris.

We process the above-mentioned Sensitive Data exclusively for the following purposes:

- Calculation of your iris code
- Comparison of your iris code with other iris codes
- Optimization of the calculation of the iris code
- Internal trainings and evaluations
- Training and development of our neural network for the recognition of human irises
- Training and development of generative models to synthesize artificial iris images
- Training and development of our fraud-detection system

You acknowledge that you can revoke your Consent at any time to the responsible entity by contacting us at:

The Worldcoin Request Portal,

privacy@worldcoin.org,

548 Market Street, PMB 49951, San Francisco, CA 94104 USA

Revocation by you of your consent shall not affect our legal basis for the processing and transport of your Sensitive Data carried out by us on the basis of the consent given by you to us prior to such revocation. Thus, our legal basis for processing your Sensitive Data is *Art. 6 para. 1 sent. 1 lit. a, Art. 7* read in conjunction with *Art. 9 para. 2 lit. a, Art. 49 para. 1 sent. 1 lit. a* of the GDPR.
